Intro: How to destroy Xbox 360, Wii and PS3 Internet connection using a Nintendo ds or ds lite.

In this instructable I will be teaching you the easy way to lose internet connection to a xbox 360 be using wi-fi connection on a Ds. Someone has confirmed that it works for ps3 but i dont have a ps3 so im taking his word. Try using the same steps as the xbox but on a ps3. Recently, someone has tested wii but i believe it may not work all the time.

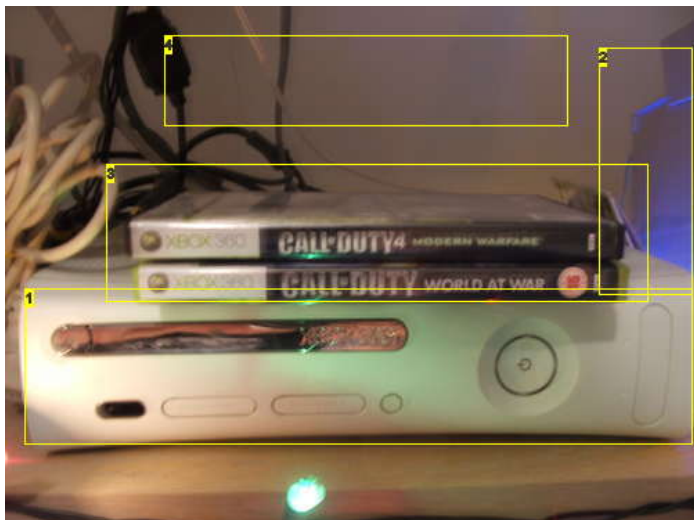

Image Notes

- 1. The enemy!
- 2. My wii!! Still you could consider it an enemy as well.
- 3. The games I hate.
- 4. Plus ps3!!!! You have got to hate that fat piece of junk.....

Image Notes

- 1. TEE HEE!!
- 2. The weapon

step 1: Blueprints

Connect to wi-fi on your ds with a game that has wi-fi game modes on it and you should see on the xbox that the connection has been lost or interrupted. It works on both the new call of duty games (4 and World at war) so it should work on other games that has xbox live on it. It should say the same for ps3 but i dont have one. Wii im not sure what it says either.

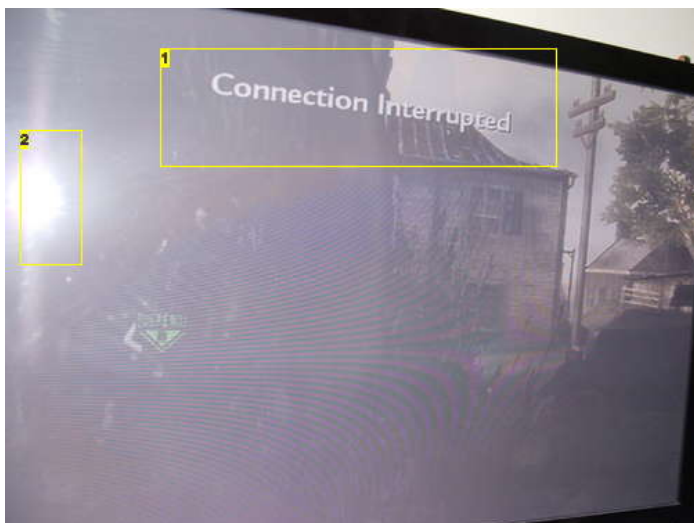

Image Notes

- 1. Thats what it should say on call of duty.
- 2. Flash

step 2: Recommendations

My brother plays cod 5 so i tend to use mario kart ds which i think has the best wifi inercepting connection things. Basically the best game to use.

Image Notes

1. Every day i see this...

step 3: If you dont know how to connect to wi-fi on your ds then follow this step.

1. Find a section saying Nintendo wi-fi settings. Go to it.
2. Press the big blue button saying Nintendo wi-fi connection settings then click on connection 1.
3. Find your internet name and connect (you may have to enter your wep key). Then it will test your connection.

Then you can connect to wi-fi.

Image Notes

1. Go to this box.

step 4: Thanks for viewing.

As the title explains... and check my account for my guns. Thank you to Kulawend who tested it and said that it worked for the ps3. Thanks to Matt1497 for the test on wii.

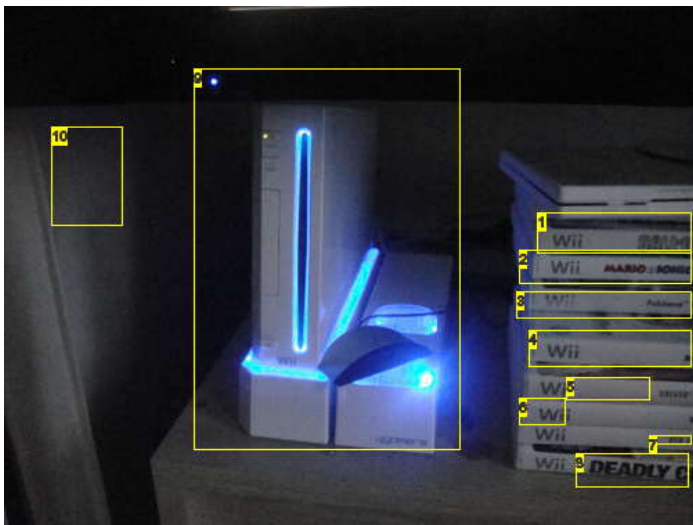

Image Notes

1. Call of duty World at war.
2. Mario + sonic
3. PBR. Pokemon battle revolution.
4. Mario kart wii.
5. Driver paralell lines.
6. wii play
7. Red steel
8. Deadly creatures.
9. Its so blue it could give you a headache.
10. Sorry. I know wii is an enemy as well but its my favourite console and i love it! Thats right ps3 and xbox360! Wii is the best!!!

This project looks awesome but there isn't enough documentation of you actually making it to be a full Instructable. There are two things which you could do. 1) If you happen to have images of you making your project you can create some more steps, add those additional photos into your Instructable and then republish your Instructable. 2) If you don't have any more pictures of you working on your project, that's ok too. That just means that your project is better suited to be submitted as a slideshow. Your images are already in your library, and you can use the same text that you have already written for your Instructable so it should only take a few minutes to create your slideshow and show the world what you made! Thanks for your submission and let me know if you have any questions along the way.

wii is the worst excuse for a consle I've ever seen everybody plays wii bowling for five hours and then never uses it again.

fishfrog27 says:

ps3 or xbox? Go on... Which one do you have? I have ammo to fire at both of them... Besides, go get a good game on wii. Wii sports isnt its best game...

Bloody Right !

Cod world of war is Awesome on Wii !

with xbox u sit down and Play with a controller

With wii your part of the action.

Thats pretty cool.

Does the DS haft to be on the same network for this to work?
or does the wifi signal from it just generally cause havoc?

fishfrog27 says:

has to be on the same network

Sorry buddy, Wii just isn't good. The only real good games for the Wii are Nintendo games. Beyond that they are garbage. BTW you should be ashamed for buying COD: WAW for Wii, by far the most finicky game I have ever played.

ROFLOL that is exactly why i got rid of my wii. I tell my friends the exact same thing when they cant decide which new console to get! I think that if the graphics were better and if the games were slightly longer (read: 2X LONGER) the system would be my favorite. people who design the wii games dont even use the motion sensor controls sometimes!!! EVEN NINTENDO! Look at smash bros. brawl or Mario galaxy. very limited use of motion controls. I wish that people would either turn the wii into an xbox knockoff or use the friggin remote! anyways ive ranted enough lol bye bye

ok first dont say it isnt good cause how come there are more wiis in the world that there are xbox360s or ps3s? next ps3 is for people who cant afford to pay 4 xbox live and xbox is for nerds who play all day. cod waw on wii is sick you probably cant even aim down your sight.

Weapon Maniac says:

Oct 17, 2009. 7:13 AM [REPLY](#)

as 4 u, i own a xbox, and i play it rarely. and i mean rarely as in every two weeks. i know im pretty steriotypical of the wii but id like it if you didnt just lump the people who just like to enjoy a game now and again with the nerds who play for days at a time.

And lol i like shooting guns and i agree- it IS more fulfilling to play cod waw on wii. i just wish it had as many features as the xbox or ps3. *sigh*

(and now bye bye for real :D)

Xbox 360 pwns wii. I'm sorry but i'd rather be killing my Germans with more than 2 buttons. Wii is great for 1st party games but anything 3rd party sucks.

fishfrog27 says:

Oct 15, 2009. 10:52 AM [REPLY](#)

why with 2 button when u can kill them with your hand (btw sniping is way better and harder on wii which makes it more fun) and with the b button. Annnndddd i play in a lobby of 4 people most of the time.

leglessekr says:

Dec 27, 2009. 10:48 AM [REPLY](#)

so what youre saying is that it sucks on the wii because it has a lack of lobbies with more than 3 other people?

The reason it is so hard to aim on the wii is because the motion sensing doesn't work correctly! It has nothing to do with the actual game design.

fishfrog27 says:

Oct 22, 2009. 7:28 AM [REPLY](#)

And if its so hard to aim on wii then how come i got 150 headshots with my FG42?

c ssgt seifer says:

Nov 3, 2009. 1:13 PM [REPLY](#)

That's because you do what we pro's call, "Spraying and praying." Listen, why don't you use a weapon that takes more skill than a 5 year old can provide, than come talk to me. With an FG42 you can just shoot through a wall and get a headshot. BTW, 150 is puny.
